

IN THE CLAIMS:

1-39. (Canceled).

40. (Currently Amended) A collapsible structure adapted to be supported on a surface and comprising:

at least three foldable frame members, each having a folded and an unfolded orientation, and with each frame member defining an interior space;

a fabric material covering each frame member to form a side panel for each frame member when the frame member is in the unfolded orientation, each side panel having a periphery;

each side panel being coupled to an adjacent side panel to form a ring of side panels [further including a left side and a right side, with the left side of each side panel coupled to the right side of an adjacent side panel, and the right side of each side panel coupled to the left side of another adjacent side panel]; and

an add-on panel coupled to the fabric material of a first of the side panels in the interior space thereof and away from the periphery thereof, the add-on panel having a foldable frame member having a folded and an unfolded orientation that is twisted and folded to form a plurality of concentric loops when in the folded orientation, and a fabric material covering the frame member for the add-on panel.

41. (Currently Amended) The structure of claim 40, wherein each side panel has a [[the]] left side and right side [of each side panel is vertical].

42. (Original) The structure of claim 40, wherein the add-on panel is a first add-on panel, further including a second add-on panel coupled to a second of the side panels, the second add-on panel having a foldable frame member having a folded and an unfolded orientation, and a fabric material covering the frame member for the second add-on panel.

43. (Original) The structure of claim 40, wherein the add-on panel is a first add-on panel, further including a second add-on panel coupled to the first side panel, the second add-on panel having a foldable frame member having a folded and an unfolded orientation, and a fabric material covering the frame member for the second add-on panel.

44. (Original) The structure of claim 43, further including a third add-on panel coupled to a second of the side panels, the third add-on panel having a foldable frame member having a folded and an unfolded orientation, and a fabric material covering the frame member for the third add-on panel.

45. (Canceled).

46. (Original) The structure of claim 40, wherein each side panel has a bottom side which rests on the surface to support the structure.

47-53. (Canceled).
